

## Ultraschall-Netzschweißmaschine GKV 6000S

The GKV 6000S is a special execution of our hundredfold proven ultrasonic net sealing automat for fat balls GKV 6000/4. This piece of equipment is a very versatile and efficient packaging machine for a variety of different products like fat balls, peanuts or sunflower seeds.

Some highlights are:

- 2 volumetric dosing systems, 1 infeed conveyor for fat balls
- net length up to 240mm, manually adjustable
- loose and inline bags
- tube diameter from 50mm to 100mm
- div. parameters adjustable via touch screen display
- bags with wineglass labels (optional)
- thermal transfer printer (optional)

and a lot features more.

Equipped with an automatic tube change system to ensure net reload without interruption of the production. Pneumatically controlled knife to separate the filled, sealed bags. Easy to maintain by the drawer-style, extractable sealing unit. Digital ultrasonic generator with automatic adjustment unit.

The manufacturer reserves the right to carry out any modifications without previous notice.
