

Ultrasonic Net Sealing Machine GKV 6800

The GKV 6800 is the youngest member of our product family of ultrasonic net sealing automats. This piece of equipment is an extremely versatile and highly efficient packaging machine for a large variety of different products.

Some highlights are:

- package size up to 1500g
- loose and inline bags
- tube diameter from 50mm to 240mm
- net length up to 800mm (theoretically limited only by the amount of netting material on the tube)
- latest servo - drive technology
- all parameters adjustable and storable via touch screen display
- bags with wineglass labels and / or banderols from seal to seal (optional)
- thermal transfer printer (optional)

and a lot features more.

Equipped with an automatic tube change system to ensure net reload without interruption of the production. Pneumatically controlled knife to separate the filled, sealed bags. Easy to maintain by the drawer-style, extricable sealing unit. Digital ultrasonic generator with automatic adjustment unit.
